

CHEWABLE TECHNOLOGY

differentiate your brand with an innovative solution and reach your product's full market potential!

Differentiate your brand with Catalent Chewable Technologies

Provide your brand with a unique cutting edge differentiation on the marketplace with our chewable softgel dosage form. Catalent's chewable is the ideal platform to deliver actives straight into the mouth using our innovative taste masked fill material solutions encapsulated in our proprietary, easy to chew, faster dissolving shells.

Chewables are ideally suited for consumers experiencing difficulties to swallow especially in the paediatric, adolescent and geriatric markets.

Liqui-Gel® chewable technology, combines our well established and patented shell technology with a wide range of formulations and can be optimized to meet the organoleptic needs of a particular patients/ consumer population.

Thinner shell chewable technology has been newly developed to improve the dissolution of the shell in the mouth for products requiring a faster oral delivery. This latest technology is also supported by patents on the manufacturing and shell compositions to further protect your brand.

Catalent is dedicated to consistent quality and excellence.

Catalent Softgel chewable technologies offer targeted solutions meeting main consumers' needs.

Ease to take Convenient portable delivery form giving consumers the flexibility to chew without the need of water at any convenient time or place

Taste and flavor Our wide experience in taste masking enables us to flavor a wide range of actives and formulations and allows us to develop custom made flavor systems.

Texture and form We can offer a wide range of fill textures varying from thicker fondant paste to thinner formulations to give required mouth feel.

DEVELOPMENT

DELIVERY

SUPPLY

We listen. Consumer testing says it all! Softgels are our customers' preferred dosage form.

"100% of consumers would buy or consider buying the softgel chewable concept based on ease and convenience to take, flavor and texture".

Start with one of our readily available off the shelf formulations (over 50 options)... or customize your own!
