

CONSUMER HEALTHCARE

A proven track record of delivering more differentiated products, faster.

For more than 75 years, Catalent has been the global leader in softgel technologies for the consumer health market, partnering with 90% of the top consumer health companies around the world on new softgel product launches in multiple categories.

We have deep expertise in all consumer health categories including **OTC, cosmetic skincare** and **dietary supplements**. As your innovation partner, we will help you address your consumers' needs by leveraging our differentiated softgel technologies, formulation expertise and robust product library to give your brand a competitive advantage in the market.

Get to market faster with RP Scherer Softgel Technology.

We can help you bring **more products to market faster** and support your business objectives of driving brand growth and market share.

With our vast product library, deep expertise and global reach we can provide:

- Proactively developed products for key analgesic and cough, cold and allergy segments, including ibuprofen and acetaminophen
- Stability-indicating analytical methods
- Unmatched fill-formulation development expertise
- A wide range of shell formulations
- A wide range of shape, size and color possibilities
- Access to our global network of softgel manufacturing sites and regulatory services, enabling geographic expansion
- Consumer research data to inform product development
- Unique capabilities to increase brand differentiation, including Graphicaps™ In-Line Printing
