

CUSTOMIZED PACKAGING SOLUTIONS FOR YOUR INJECTABLE PRODUCTS

Catalent offers a vast array of packaging solutions that are tailored to meet your unique needs

For more than 15 years, Catalent has developed and delivered a wide range of fully integrated solutions to help improve the performance of customers' injectable products, from vial and syringe labeling, to innovative kitting and adherence offerings.

Custom Packaging Solutions With our wide range of formats and extensive capabilities, we work with you to design packaging and kitting specific to your customers' needs.

Special Handling Expertise Our unmatched cold-chain handling and storage capabilities improve speed to market and minimize financial and regulatory risks.

Reliable Quality and Supply With our state of the art equipment, extensive packaging expertise, inspection-ready mentality and relentless commitment to quality, we are committed to delivering your product safely and reliably.

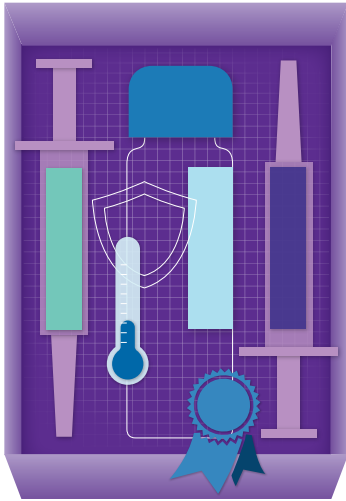

All of the injectable packaging capabilities you need, under one roof

Catalent's industry-leading capabilities and expertise in injectables packaging are on display in a variety of ways:

Vast Pre-Filled-Syringe Labeling & Packaging Options Our custom pre-filled syringe capabilities can label and package over 150 million syringes annually, and supports plunger rod and finger flange insertion, as well as de-nesting/re-nesting.

High Speed Vial Labeling Capacity Catalent can label upwards of 100 million units with our high-speed Newmann and Weiler labeling machinery.

Additional Services Catalent also offers cold storage with redundant refrigeration, on-demand capacity and recovery capabilities, stability storage and testing, retain storage and reporting, and raw material ID testing.

Our custom kits can include unique features that only Catalent can offer

Our proprietary technologies and focus on patient-centric packaging helps us tailor features that help improve your patient's engagement and experience.

Improved Patient Adherence Our unique Adherence by Design™ approach to innovative packaging and kitting means we design solutions from the ground up to engage patients, increase refill rates, and drive adherence to treatment regimens

Patient Connection Catalent's proprietary Media Enhanced Packaging™ technology offers dynamic patient connections via the Internet for communicating dosage instructions, multilingual videos, loyalty program details, or any other important product information.

Award-Winning Design Services - Having invented a variety of proprietary technologies and received numerous design awards, Catalent's design team offers unmatched capabilities and a commitment to tailored solutions. Our team brings this industry-leading expertise to your challenges, developing customized designs that are highly functional and cost-effective, while enhancing patient engagement and delivering your brand promise.

An unmatched global quality system, extensive regulatory expertise, and manufacturing excellence will ensure your product is reliably supplied

Manufacturing Expertise For over 70 years we have provided specialized scientific and manufacturing expertise and tailored solutions for complex injectable treatments.

Integrated Services Our global, integrated supply chain solutions and unmatched packaging expertise provide tangible cycle time, working-capital and resource benefits.

Proven Excellence Catalent supports the top pharmaceutical manufacturers of syringe and vial products in the United States and has proven capability to scale up in support of pandemic demand.

Inspection-Ready, Everyday Our facilities have a proven track record of successful inspection by regulatory agencies, including the FDA, DEA, MHRA, ANVISA, as well as countless customers. We are committed to quality excellence and pride ourselves on being inspection-ready at all times.
